Title: INTERNET PRINT MANAGING SYSTEM AND METHOD WITH PRINT JOB DISTRIBUTION

---

**IN THE CLAIMS**

Please cancel claim 10 without prejudice.

Please amend claims 1-9, 11-19, and 33 as follows:

1. (Currently Amended) A method of managing print services provided by a print provider, the method comprising ~~the steps~~:
  - ~~— defining a print managing system controller having the print services provided by the print provider registered therewith;~~
  - defining a network communication link between the print provider and ~~the~~ a print managing system controller;
  - presenting the print provider with a print provider interface;
  - registering the print services provided by the print provider with the print managing system controller via the print provider interface and the network communication link;
  - receiving a job ticket for a print job at the print managing system controller;
  - determining via the print managing system controller if the print provider has the print services to fulfill the print job, including comparing the job ticket for the print job with the print services provided by the print provider; and
  - distributing the job ticket for the print job to the print provider via the network communication link if the print managing system controller determines that the print provider has the print services to fulfill the print job.
2. (Currently Amended) The method of claim 1, wherein ~~the step of~~ defining the network communication link includes defining an Internet communication link between the print provider and the print managing system controller, and wherein ~~the step of~~ distributing the job ticket for the print job includes distributing the job ticket for the print job to the print provider via the Internet communication link.
3. (Currently Amended) The method of claim 1, wherein ~~the step of~~ receiving the job ticket includes receiving the job ticket for the print job via the network communication link.

Title: INTERNET PRINT MANAGING SYSTEM AND METHOD WITH PRINT JOB DISTRIBUTION

---

4. (Currently Amended) The method of claim 1, wherein ~~the step of receiving the job ticket~~ includes receiving the job ticket for the print job from a customer.
5. (Currently Amended) The method of claim 4, wherein ~~the step of defining the network communication link~~ includes defining the network communication link between the print provider, the customer, and the print managing system controller, and wherein ~~the step of receiving the job ticket~~ includes receiving the job ticket for the print job from the customer via the network communication link.
6. (Currently Amended) The method of claim 1, wherein ~~the step of receiving the job ticket~~ includes receiving the job ticket for the print job from another print provider.
7. (Currently Amended) The method of claim 6, wherein ~~the step of defining the network communication link~~ includes defining the network communication link between the print provider, the other print provider, and the print managing system controller, and wherein ~~the step of receiving the job ticket~~ includes receiving the job ticket for the print job from the other print provider via the network communication link.
8. (Currently Amended) The method of claim 1, wherein ~~the step of receiving the job ticket~~ includes receiving at least one of a file format, a number of copies, a print medium, a printing layout, a printing quality option, a color printing option, a finishing option, a delivery option, and a customer identification for the print job.
9. (Currently Amended) The method of claim 1, further comprising ~~the step of:~~  
associating a data file for the print job with the job ticket for the print job, wherein ~~the step of distributing the job ticket~~ includes distributing the job ticket and the data file to the print provider via the network communication link.
10. (Cancelled)

Title: INTERNET PRINT MANAGING SYSTEM AND METHOD WITH PRINT JOB DISTRIBUTION

11. (Currently Amended) The method of claim 10~~1~~, wherein ~~the step of~~ registering the print services includes storing the print services provided by the print provider and wherein ~~the step of~~ comparing the job ticket includes retrieving the print services provided by the print provider.
12. (Currently Amended) The method of claim 10~~1~~, wherein ~~the step of~~ registering the print services includes registering a printing capability of the print provider with the print managing system controller.
13. (Currently Amended) The method of claim 10~~1~~, wherein ~~the step of~~ registering the print services includes registering at least one of a file format compatibility, a print medium capability, a printing layout capability, a printing quality capability, a color printing capability, a finishing capability, a delivery capability, and an identification of the print provider.
14. (Currently Amended) The method of claim 10~~1~~, wherein ~~the step of~~ registering the print services includes updating the print services provided by the print provider when the print services provided by the print provider are modified.
15. (Currently Amended) The method of claim 1, wherein ~~the step of~~ distributing the job ticket is performed by the print managing system controller.
16. (Currently Amended) ~~The method of claim 1, wherein the step of distributing the job ticket includes~~ A method of managing print services provided by a print provider. the method comprising:  
defining a print managing system controller having the print services provided by the print provider registered therewith;  
defining a network communication link between the print provider and the print managing system controller;  
receiving a job ticket for a print job at the print managing system controller;

Docket No.: 10003972-1

Title: INTERNET PRINT MANAGING SYSTEM AND METHOD WITH PRINT JOB DISTRIBUTION

determining via the print managing system controller if the print provider has the print services to fulfill the print job, including comparing the job ticket for the print job with the print services provided by the print provider;

automatically distributing the job ticket for the print job to the print provider via the network communication link if the print managing system controller determines that the print provider has the print services to fulfill the print job; and

distributing-redispatching the job ticket for the print job to another print provider having print services to fulfill the print job when the print provider is unable to fulfill the print job.

17. (Currently Amended) The method of claim 1, further comprising ~~the steps of:~~ completing the print job with the print services provided by the print provider; and delivering the print job.

18. (Currently Amended) The method of claim 1, further comprising ~~the steps of:~~ tracking a status of the print job with the job ticket for the print job.

19. (Currently Amended) A system for managing print services provided by a print provider, the system comprising:

a print managing system controller configured to have the print services provided by the print provider registered therewith; and

a print provider interface communicated with the print managing system controller, wherein the print services provided by the print provider are registered with the print managing system controller via the print provider interface,

wherein the print managing system controller is adapted to receive a job ticket for a print job and compare the job ticket with the print services provided by the print provider to determine if the print provider has the print services to fulfill the print job, and

wherein the print managing system controller is adapted to distribute the job ticket for the print job to the print provider if the print managing system controller determines that the print provider has the print services to fulfill the print job.

**Title: INTERNET PRINT MANAGING SYSTEM AND METHOD WITH PRINT JOB DISTRIBUTION**

---

20. (Original) The system of claim 19, wherein the print managing system controller is configured to communicate with the print provider via a network communication link, and wherein the print managing system controller is adapted to distribute the job ticket for the print job to the print provider via the network communication link.

21. (Original) The system of claim 20, wherein the network communication link is an Internet communication link.

22. (Original) The system of claim 19, wherein the print managing system controller is adapted to receive the job ticket for the print job via a network communication link.

23. (Original) The system of claim 22, wherein the network communication link is an Internet communication link.

24. (Original) The system of claim 19, wherein the print managing system controller is adapted to receive the job ticket for the print job from a customer.

25. (Original) The system of claim 24, wherein the print managing system controller is configured to communicate with the customer via a network communication link, and wherein the print managing system controller is adapted to receive the job ticket for the print job from the customer via the network communication link.

26. (Original) The system of claim 25, wherein the network communication link is an Internet communication link.

27. (Original) The system of claim 19, wherein the print managing system controller is adapted to receive the job ticket for the print job from another print provider.

28. (Original) The system of claim 27, wherein the print managing system controller is configured to communicate with the other print provider via a network communication link,

and wherein the print managing system controller is adapted to receive the job ticket for the print job from the other print provider via the network communication link.

29. (Original) The system of claim 28, wherein the network communication link is an Internet communication link.

30. (Original) The system of claim 19, wherein the job ticket for the print job includes at least one of a file format, a number of copies, a print medium, a printing layout, a printing quality option, a color printing option, a finishing option, a delivery option, and an identification for the print job.

31. (Original) The system of claim 19, wherein the print managing system controller is adapted to receive a data file for the print job, and wherein the print managing system controller is adapted to distribute the job ticket and the data file to the print provider via a network communication link.

32. (Original) The system of claim 31, wherein the network communication link is an Internet communication link.

33. (Currently Amended) The system of claim 19, wherein the print services provided by the print provider are registered with the print managing system controller via the print provider interface and a network communication link.

34. (Original) The system of claim 33, wherein the network communication link is an Internet communication link.

35. (Original) The system of claim 19, further comprising:  
a print managing data storage system configured to communicate with the print managing system controller, wherein the print managing system controller is adapted to store a registration of the print services provided by the print provider in the print managing data storage system.

Title: INTERNET PRINT MANAGING SYSTEM AND METHOD WITH PRINT JOB DISTRIBUTION

---

36. (Original) The system of claim 19, wherein the print services provided by the print provider include a printing capability of the print provider.

37. (Original) The system of claim 36, wherein the printing capability of the print provider includes at least one of a file format capability, a print medium capability, a printing layout capability, a printing quality capability, a color printing capability, a finishing capability, a delivery capability, and an identification of the print provider.

38. (Original) The system of claim 19, wherein the print services provided by the print provider are updated in the print managing system controller when the print services provided by the print provider are modified.

39. (Currently Amended) The system of claim 19, A system for managing print services provided by a print provider, the system comprising:

a print managing system controller configured to have the print services provided by the print provider registered therewith,

wherein the print managing system controller is adapted to receive a job ticket for a print job and compare the job ticket with the print services provided by the print provider to determine if the print provider has the print services to fulfill the print job,

wherein the print managing system controller is adapted to automatically distribute the job ticket for the print job to the print provider if the print managing system controller determines that the print provider has the print services to fulfill the print job, and

wherein the print managing system controller is adapted to distribute-redispatch the job ticket for the print job to another print provider having print services to fulfill the print job when the print provider is unable to fulfill the print job.

40. (Original) The system of claim 19, wherein the print managing system controller is adapted to track a status of the print job with the job ticket for the print job.
